## Untreated Inoperable Tumor of the Sigmoid and Rectum

Complete Long Term Remission of an Untreated Inoperable Tumor of the Sigmoid and Rectum through the Immunobiological Issels Treatment without Standard Treatment

**Patient G. Sch., Born 1899, File 183/55**

**15 years cancer free without recurrence, patient leading a normal healthy life, fully fit for work.**

TREATMENT HISTORY [First Diagnosis](#) | [Standard Treatment](#) | [Issels Treatment](#)  
[First Diagnosis](#)

May 1955

**Diagnosis: Upon exploratory laparotomy: Inoperable carcinoma of the sigmoid and rectum which cannot be encircled by hand anymore, and which is firmly adherent to the sacrum and prostate gland. Secondary deposits are present in the para-aortal lymphnodes.**

Histology: Histological examination was renounced due to the evidence on operation. A biopsy from a rectum polyp before operation shows ...suspected malignant transformation in the neighboring tissue not seized by the biopsy...Pathol. Inst. Frankfurt/Germany.

**Treatment: Surgical Removal of tumor mass not possible, only exploratory laparotomy. No Standard Treatment.**

### [Issels Treatment](#)

June 1955

**Admission exam: Extensive primary carcinoma of the sigmoid and rectum.**

June to November 1955

Issels Treatment: 20 weeks of immunobiological in-patient treatment with 6 months of out-patient follow-up treatment.

December 1955

Independ. Findings: Partial remission.

# Issels Immuno-Oncology

## June to July 1956

Issels Treatment: 5 weeks of immunobiological in-patient and several months of out-patient follow-up treatment.

## July 1956

**Discharge exam: Radiologically and rectoscopically no evidence of residual disease.**

## March to April 1958

Issels Treatment: 4 weeks of immunobiological in-patient and several months of out-patient follow-up treatment.

**Reposition of the colostomy.** (Restoration of normal intestinal conditions).

**No pathological findings at manual examination of abdominal cavity.**

## **Follow-up until 1971**

**15 years cancer free without recurrence, patient leading a normal healthy life, fully fit for work.**

DISCLAIMER: No claim is made that patients with similar diagnosis and/or treatment(s) will respond to the same extent as the patients shown. All testimonials have been provided voluntarily to share a patient's experience with the Issels Treatment and their state of health at the time. Some patients may have passed away due to age or disease. None of these patients received compensation or are related to the Issels Treatment Centers.
